

Partgowl has achieved the title of the National and Provincial Sample Exporter for three consecutive years, from 2020 to 2022, among the largest manufacturing and trading companies. Partgowl has successfully climbed the rankings in Iran's top 500 companies for two consecutive years, based on annual sales. The rankings are organized by the IMI 100 organization. The company has made impressive progress, moving from the 269th position to the 190th rank. Its vision is now set on reaching the top 100 in the coming years, aiming for even greater achievements

ABOUT US

Partgowal registered under number 34115 on 05.10.2008 to manage and coordinate the activities of the company mining, mining industries and trading of metals and alloys. Besides the management and harmonization of the different units, the aim of the company is constant development by finding and creating new opportunities based on mining potentials in Iran. Our head office is located in Mashhad in North East of Iran. Now we are the only producer of High Carbon Ferrochrome in Iran, also the only antimony mine owner & producer of antimony ore.

OUR CORE COMPETENCIES :

Consistently high quality

Formidable size and selling power

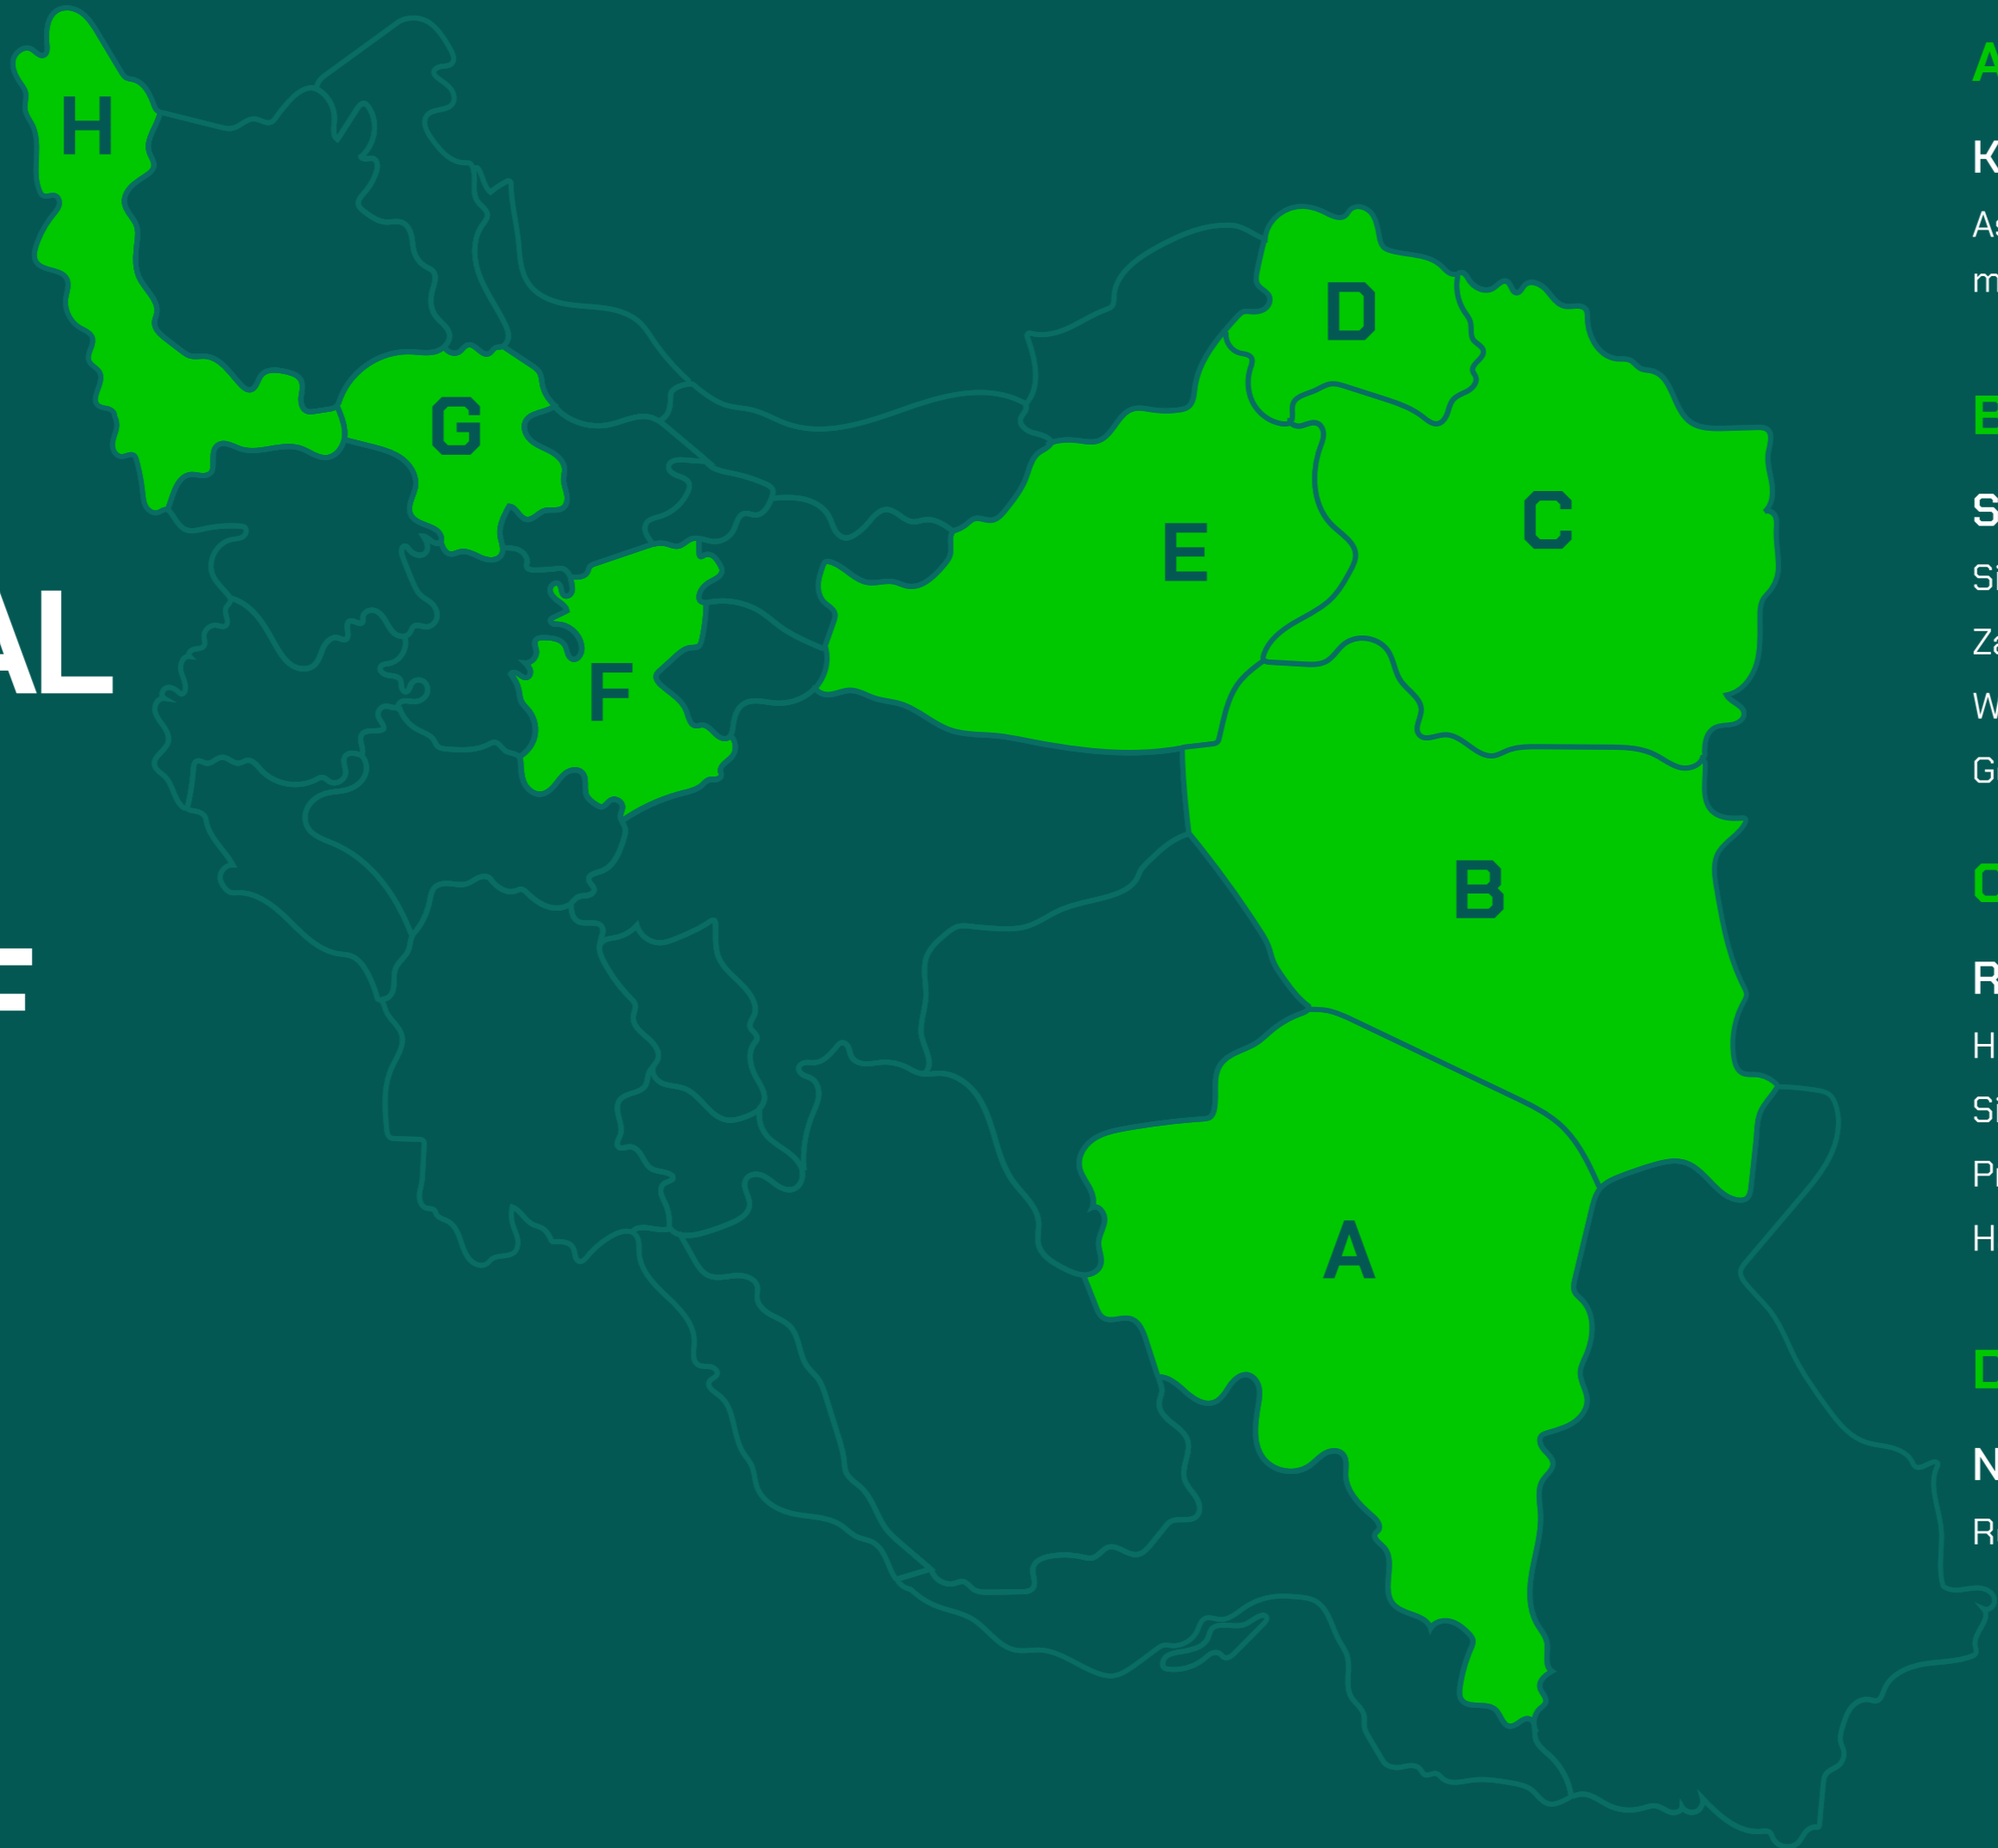

Customer Orientation

Strong communication network with customers

Innovative & successful marketing

Committed to the social responsibilities

INDUSTRIAL PARTGOWAL

**HIGH-CARBON AND
LOW CARBON FERROCHROME**

Staff: 522
Annual production: 30,000 tons HC & 16,000 tons LC
Annual domestic demand: 10,000 tons HC & 4,000 tons LC
Export volume: 20,000 tons HC & 12,000 tons LC
Annual chromite demand (raw material): 120,000 tons

PIG IRON AND STEEL BILLETS

Staff: 430
Annual output production: 250,000 tons
Location: Rahmaniye Industrial Zone, Khouf, Birjand

SILICON METAL

Product: Silicon Metal (4-4-1)
Production Capacity: 1100Mt/Year
Location: Joghatay, Sabzevar, Khorasan Razavi, Iran
Expansion Program: Production of UMG (Solar Grade):6N Si

COPPER CATHODE

Staff: 86
Factory name: Euro-Persia
Annual production: 1,000 tons of cathode
Production process: Leaching & electrowinning

MINE PARTGOWAL

ASMINON CHROMITE MINE

The name of the mine: Asminon Chromite The biggest chromite mine in Iran
Mineral: Chromite ore
Area: 73.62 km²
Definite storage: 1,737,444 tons
Potential savings: -
Grade: 35.62%
Location: Kerman Province, Manoja City, Asminon District
Production plan: Monthly extraction of 150,000 tons of lumps and 50,000 tons of chromite concentrate

GHALEZARI COPPER MINE

The deepest underground copper mine in Iran [-380 Meter depth]
Mineral: Copper Ore And Concentrate
Area: 47/14 km²
Definite Storage :2.300.000 TON
Potential Savings: 2.500.000
Grade: 8%
Location: South Khorasan Province, Khosef City, Ghalezari District
Production Plan: Monthly production of 750 tons of copper, gold, silver with a grade of 16% copper, 5ppm gold and 350ppm silver

KERVER COPPER MINE

The name of the mine: Kerver Copper
Mineral: Copper ore
Area: 40 km² Definite
Storage: 73,700,000 tons
Potential savings: 120,300,000 tons
Grade: 0.29%
Location: Kerman Province
Production plan: Monthly production of 5,000 tons of copper concentrate with a grade of 20%

SIRZAR ANTIMONY MINE

The name of the mine: Sirzar Antimony
Sirzar antimony mine, the only producer of antimony concentrate in Iran.
Mineral: Antimony
Area: 10/34 km²
Definite Storage: 100.000TON
Potential Savings: 300000
Grade: 3 %
Location: Razavi Khorasan Province, Torbat Jam City, Nasrabad District
Production Plan: Monthly Production Of 200 Tons of Antimony Concentrate with grade OF 30%.

FLOSPAR MINE

The name of the mine: Flospar
Mineral: Florin
Area: 7/77 km²
Definite Storage: 50000TON
Potential Savings: 500000TON
Grade: 50 %
Location: South Khorasan Province
Production Plan: Monthly production of 800 tons of acid grade fluorine concentrate with a grade of 97%

KHALIFA LU MINE

The name of the mine : Khalifa Lu
Mineral : Copper
Area: 3/68 km²
Definite Storage :750000TON
Potential Savings : 1500000TON
Grade :0/8%
Location : Zanjan province
Production Plan: Monthly production of 500 tons of copper and gold concentrate with 20% copper and 25ppm gold.

OUR CUSTOMERS IN INTERNATIONAL TRADE

EXPORT

- High Carbon Ferrochrome
- Foundry & Basic Grade Pig Iron
- Ferro Silicon
- Ferro Molybdenum
- Grinding Ball
- Titanium Concentrate
- Copper Concentrate
- Iron ore Concentrate
- Sintered Iron ore

IMPORT

- Silico Manganese
- High Carbon Ferromanganese
- Nickel Cathode
- Cobalt
- Silicon Metal
- Magnesium Metal
- Ferro Titanium
- Ferro Vanadium
- Petroleum Coke
